Long standing relationship understanding the processes of manufacture and client's specific requirements

Bachem is an independent, technology-based, public biochemicals company providing full service to the pharma and biotech industry. Bachem is specialized in the process development and the manufacturing of peptides and complex organic molecules as active pharmaceutical ingredients (APIs), as well as innovative biochemicals for research purposes.

Within the last 15 years ACR have been commissioned to:

- Provide Project Management advice in relocation of existing facilities to a new site
- Design, Project Management & Delivery of new 15,000 sq ft building extension & new 7,500 sq ft bespoke Laboratories.
- Design, Project Management & Delivery of new 7,500 sq ft bespoke Laboratories

Services:

- Building Design – Feasibility, Planning, Building Regulations & Construction Phases
- Structural Engineering
- Space Planning
- Contract Administrator
- Client Representative
- CDM Coordinator / Principal Designer
- Cost Consultancy
- Project Management

Benefit:

- Long standing relationship understanding the processes of manufacture and client's specific requirements

We have used ACR on many occasions over the last 10 years to provide advice and expertise relating to an extensive range of building services, most noteworthy being the Phase I fit-out of our current site and Phase II extension build and fit-out, including initial contract tenders, project management and full CDM compliance. All projects were completed on-time and within budget thanks to ACR. At all times they were professional, reliable and dedicated and provide a high-calibre consultancy service that we will continue to use for future requirements and would highly recommend.
