

Building Designers & Engineers
Facilities Management &
Property Maintenance
CDM Consultancy

ITT Industries
Engineered for life

Single point of contact for all issues relating to building maintenance and legal compliance.

ACR have now worked on two major building refurbishments and modifications. Both jobs were required to be completed in a very limited timescale and with tight budgets, but through the knowledge and expertise of ACR both jobs were completed on time and within budget.

Having now completed the most recent project your continued support through an excellent 'Facilities Management' programme in ensuring that the building and its internal fixtures not only are fully maintained but all system / risk assessments are in place to meet with UK legislation.

May I thank you and your staff who not only have expert knowledge and understanding of building and legal requirements for being part of what I would consider to be a totally professional organisation.

Pro Service Manager UK & Scandinavia
ITT Industries

ITT is a leading manufacturer of highly engineered, customized solutions for the energy, transportation and industrial markets.
